OCUSOOOTHE[®]

EPA:325mg, DHA:175mg, Vitamin D₃: 400 IU & Lutemax 2020: 25mg Capsules

With **Lutemax[®]**
LUTEIN & ZEAXANTHIN 2020

1st
TIME IN INDIA

Complementing dry eye management

Ocusoothe Capsules

COMPOSITION:

Each Softgel Capsule contains:

Omega-3-Fatty Acid	500 mg
(Providing Eicosapentaenoic Acid 325 mg Docosahexanoic Acid 175 mg)	
Lutein/Zeaxanthin Complex	25 mg
[LUTEMAX 2020 Providing Lutein 5 mg Zeaxanthin (RR & RS) 1 mg]	
Vitamin D3	400 IU
Excipients q.s.	

INDICATIONS: Dry Eye Disease

DOSE: 1 capsule twice daily

MECHANISM OF ACTION:

Omega 3 fatty acids- EPA:325 & DHA:175: Enhances secretion of lipid layer thereby stabilizing tear film and controlling ocular surface inflammation. They act competitively as substrate for both enzymes cyclooxygenase and 5-lipoxygenase. The anti-inflammatory action is believed to result from the synthesis of prostaglandin E3 (PGE3) and of leukotriene B5 (LTB5) (from EPA that inhibits the conversion of AA to potentially harmful inflammatory mediators prostaglandin E2 (PGE2) and leukotriene B4 (LTB4).

Vitamin D3(400 IU): Controls ocular surface inflammation by inhibiting cytokines, IL-6 & IL-8

Lutemax 2020: The only source of Lutein, Zeaxanthin (RR) & Meso(RS) Zeaxanthin offering additional protection to dry eye patients by antioxidant. Also Filters harmful blue violet light effectively & minimizes damage from exposure to digital screens.

CLINICAL EFFICACY: Proven efficacy of the components in multiple studies.

SAFETY: Commonly reported side effects of omega-3 supplements are usually mild. As per the European Food Safety Authority, long-term consumption of EPA and DHA supplements at combined doses of up to about 5 g/day appears to be safe. The US FDA recommends not exceeding 3 g/day EPA and DHA combined, with up to 2 g/day from dietary supplements.

PACKING: Strip of 10 Capsules, Carton of 3 strips
